

HAMZA BOURAS

Software engineer

Sale, Bab lamrissa Fadl lah | +212 766-712623 | hamzabrse333@gmail.com | LinkedIn : [@Hamza Bouras](#)

PROFIL PROFESSIONNEL:

Junior Software Engineer with a background in Computer and Network Engineering, specializing in MIAGE. Passionate about software development and eager to apply my skills to contribute actively to innovative projects.

PROFESSIONAL EXPERIENCE:

Géomatic

Full Stack Engineer | July 15, 2024 – Present

- Maintenance of an **ASP.NET** application using the **ArcGIS API for JavaScript**, including anomaly management, **SQL Server** database updates, **SSL certificate** configuration, and deployment on **IIS**.
- Development of **GIS APIs** with ArcGIS, including creating, editing, and deleting spatial geometries using Python and **ArcPy** library, and deploying on **ArcGIS Server**.

Fevertokens

Internship - Backend Engineer | March 1, 2024 – July 10, 2024

- Architected **OpenAPI SDK** and secure **blockchain** transaction system using **TypeScript**, **AWS Lambda**, **Serverless Framework**, and **KMS** for digital asset management
- Engineered serverless microservices for **Wallet-as-a-Service** platform, implementing crypto wallet operations and blockchain integrations

ARB S.A.R.L Kenitra

Software Developer Internship | July 10, 2023 – September 28, 2023

- Development of a task management application using **Spring Boot** and **Angular**, with **JWT authentication**.
- Containerization of the application using **Docker**.

Soft High Tech Salé

Web Developer Internship | July 1, 2022 – September 20, 2022

- Development of a web application for employee management using **Laravel** for Soft High Tech.
- Configuration of a **MySQL** relational database to store employee information.
- Implementation of authentication using **Fortify**, profile management, and report generation features.

ACADEMIC AND PERSONAL PROJECTS

Serverless PDF Management and Note Taking Platform: Ongoing project

- Serverless Architecture: Using **AWS Lambda**, **DynamoDB**, and **Cognito** for backend services and authentication.
- Next.js Frontend: Developing a responsive UI with **Next.js** and App Router.
- PDF Storage & AI Integration: Storing PDFs in **AWS S3** and leveraging **OpenAI** for AI-powered note-taking.

School Management System: Developed with Spring, Angular, and AWS.

- Development of a secure backend with **Spring Boot** for efficient management of students and payments.
- Elegant and responsive user interface developed with **Angular** and **Angular Material**.
- **CI/CD** pipeline development using **GitHub Actions**: unit tests, **SonarQube**, **Trivy**, **Docker** build, push to **ECR**, deployment on **EC2**, and infrastructure management with **Terraform**.

EDUCATION:

2019 - 2024 | Moroccan School of Engineering Sciences (EMSI)

Computer and Network Engineer, specializing in MIAGE (Applied Computer Methods for Business Management)

TECHNICAL SKILLS:

- Frameworks: Spring Boot, Serverless, Angular, .NET, React, Next.js
- DevOps: AWS, CI/CD, Git, Docker, Kubernetes
- Databases: SQL Server, PostgreSQL, MySQL, NoSQL
- Programming Languages: Java, JavaScript, TypeScript, Python, C#

SOFT SKILLS

- Effective Communication
- Interpersonal Skills
- Initiative

CERTIFICATS

- Java Programming: Solving Problems with Software, from Duke University, in 2023.
- AWS Cloud Technical Essentials, from Amazon Web Service, in 2023.
- Machine Learning with Python, from IBM, in 2024
- Data Collection and Processing with Python, from University of Michigan, in 2023.
