Hamza Bouras

Professional Experience

Fullstack Engineer, fulltime July 2024 - Present
Géomatic

- Maintenance and evolution of a Real Estate Application in **ASP.NET** for the **OCP group**: Developing new modules, fixing bugs, Creating **SQL scripts** for optimizing the **SQL Server** database, correcting data types, managing relationships and constraints, and developing mapping interfaces with the **ArcGIS API for JavaScript**.
- Deployment and migration to the production environment: Configuring the **IIS server**, setting up **SSL/TLS** certificates, developing **PowerShell scripts** for backup automation, and publishing mapping services with **ArcGIS Server**.
- Development of reusable **React** components using **TypeScript** with the **ArcGIS API**, reducing development time by **15%** and enhancing the user experience in Experience Builder.
- Designed and deployed geoprocessing APIs using **Python** and **ArcPy**, enabling users to perform spatial analyse.

Backend Engineer, intern Mars-July, 2024
FeverTokens

- Designed an **OpenAPI SDK** and a secure blockchain transaction system using **TypeScript**, **AWS Lambda**, **Serverless Framework**, and **KMS** for digital asset management.
- Developed serverless microservices for a **Wallet-as-a-Service** platform, integrating crypto wallet operations and **blockchain** integration features.

EDUCATION

Moroccan School of Engineering Sciences (EMSI)
Computer and Network Engineer, specializing in MIAGE
2019- 2024

Bachelor's degree in Physics and Chemistry
El Farabi
2018 - 2019

CERTIFICATIONS

- Java Programming: Solving Problems with Software, from **Duke University**.
- AWS Cloud Technical Essentials, from **Amazon Web Service**.
- Data Collection and Processing with Python, from **University of Michigan**.
- Mastering Ansible Automation, from **Codio**.
- Introduction to Containers w/ Docker, Kubernetes & OpenShift, from **IBM**.
- Advanced React, from **Meta**

PROJECTS

Projet: Developed a comprehensive student payment management platform with a **cloud-native** architecture, integrating a secure **Spring Boot** backend and a responsive **Angular Material** interface. Fully automated the deployment pipeline and **AWS** cloud infrastructure.

Tools: Spring Boot, Angular, AWS (EC2, ECR), Docker, GitHub Actions, Terraform, SonarQube, Trivy

Projet: Developed an interactive web-based geospatial mapping application for analyzing and visualizing stations, with Python scripts for processing spatial data and transforming it into **GeoJSON**.

Tools: Spring Boot, Angular, ArcGIS API, PostGIS, ETL, Python, GeoPandas, SQL Alchemy, Shapely

Projet: Created an advanced AI tool suite for automated CV analysis, conversation summarization, and insights extraction, harnessing the power of **LangChain** and **OpenAI** with a cutting-edge **cloud-native** architecture.

Tools: LangChain, OpenAI, Next.js, Puppeteer, AWS S3, Prisma/Neon, Tailwind, shadcn, Google Auth

Projet: Developed a Conversational assistant that answers database/SQL queries using **RAG** architecture that combines **vector search** and **LLM** technology with audio/video transcription capabilities and optimized vector search.

Tools: Python, FastAPI, Streamlit, FAISS, HuggingFace Embeddings, Whisper, Groq API, SQLite, Langchain, Docker

SKILLS

- Programming:** Java, Typescript, Javascript, Python, SQL, C#
- Backend:** Spring Boot, ASP.NET, Node.js
- Frontend:** Next.js, React, Angular, Angular Material, Shadec, Tailwind, Bootstrap
- Databases:** SQL Server, PostgreSQL, Mangodb, Vector Databases
- Cloud Computing:** AWS (S3, EC2, Lambda, IAM, DynamoDB, ECR)
- DevOps & Tools:** Git, Github Actions, Terraform, Ansible, SonarQube, CI/CD, Docker
- Project Management:** Problem Solving, Client Communication, Agile, Scrum, Kanban
